

About OurSpace4Kids

The idea for this domain and model of a 21st century one-room schoolhouse for support services grew from many years of the owner's classroom experiences teaching preschoolers up through elementary age groups. Thirty years of working with diverse groups of kids taught the domain owner Connie Anderson the importance of balancing current technology sensibly, with research-based curriculums, musical strategies, and core values to affect how children learn. Connie's love of using music to affect how and what children learn has earned her two awards in 2016!

In 2016, Connie's digital one-room schoolhouse model was recognized by PBS Learning media as a "Digital Innovator." In the same year, at a music institute conducted by well-known music directors locally and globally; and attended by accomplished musicians coming from all parts of our country, Connie was awarded "the most improved!" She learned new skills as one of six members of the percussion section. With excitement, she now can relate this experience to her innovative musical strategy that uses percussion instruments to help children improve their listening skills! (www.ourspace4kids.com/learn.html) The free digital schoolhouse was designed in 2014 to be supported financially by sales of original instructional music featured on the learn page of Our Space4Kids.
